

# Intelligent Orchestration for Smart Cities of Tomorrow

Powered by Certis, **Mozart** is an intelligent orchestration platform that unites people, processes, and technology into one connected engine for smarter cities. Built on deep Ops-Tech expertise, it transforms urban operations through AI and digitalisation, enhancing performance, driving efficiency, and advancing sustainability across complex, connected environments.

# BUILT SMART, INTELLIGENT AND SUSTAINABLE

Mozart is purpose-built to orchestrate your operations and teams at scale — not just as a platform, but as a system designed by operators who know how workflows succeed in the real world.

With our operational expertise at the core, Mozart integrates people, processes, and technology into a single flow, ensuring that every system is configured and every workflow managed for maximum efficiency, adaptability, and control.

## WHY MOZART?

Deploy solutions faster

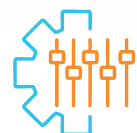

Integration with any asset

Respond instantly to changes

Scale what you need, when you need it

Customisable to any environment - on-premise, cloud, or hybrid

Go paperless with our powerful mobility app

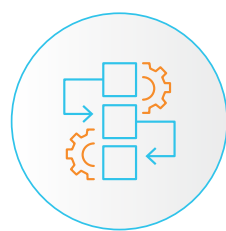

## WHAT CAN MOZART DELIVER?

Unified Data  
Integration Across  
Diverse Systems

Real-time  
Processing and  
Intelligent Analytics

End-to-end Ecosystem  
with Secure,  
Scalable Services

Best-in-class  
Operational  
Design

Better Performance  
for a Sustainable  
Future

## WHAT YOU CAN USE MOZART FOR?

Visualisation and Task Management

Digitalised Asset Management

Cyber Security & Safety Compliance

Situation Awareness

Intelligent decisions with AI

Asset and Cost Performance

# KEY FEATURES

## REAL-TIME CAPABILITIES

- Operational Dashboard
- Floorplan Visualisation
- Asset and Workforce Visibility
- Alerts & Notifications
- Object Recognition

## DEVELOPER TOOLS

- Workflow Modeling
- Access Role Management
- Pre-Integrated Assets
- API Integration
- Tasking Modeling

### EQUIPMENT

- ACS
- ACMV
- Lift soap dispensers
- Health checks
- UV sterilisers

### CAMERAS

- Thermal
- CCTV
- People Counters

### ACCESS CONTROL

- Cards
- Gates
- Biometric (FR, Iris and FP)

### SENSORS

- Bluetooth
- Counting
- Beacon
- LiDAR

### APPLICATIONS

- Real-Time Location Services
- HR/HCM
- Legacy Systems

## COMMAND CENTRE

# FIVE CORE CAPABILITIES IN ACTION

## VISUALISATION

View your operations in real time, with digital twins driving faster, smarter decisions

- Indoor & outdoor maps
- Real-time asset tracking
- Immersive digital twin environments

## WORKFORCE MANAGEMENT

Maximise efficiency with AI-powered rostering and tracking for smarter deployment

- Smart rostering
- Time & attendance
- Guard tour management

## SECURITY MODULES

Redefine safety with unified dashboards and AI-driven analytics

- Incident & case management
- CCTV virtual patrols
- AI-driven detection & monitoring

## FACILITIES MANAGEMENT

Optimise facility performance with dashboards, work orders and lifecycle management

- Preventive maintenance scheduling
- Inventory tracking & audit
- Centralised service requests

## MOZART MOBILITY

Keep your teams agile and accountable with intelligent task allocation and insights

- Task assignment
- Performance and insights
- Dynamic, customisable analytics
