

WALLACE

AI-POWERED AUTONOMOUS PATROL FOR SAFER, SMARTER SPACES

Wallace **automates routine patrols** across large and complex environments, extending security coverage and equipping frontline teams with real-time intelligence.

EXTENDED COVERAGE

Consistent patrol visibility
– indoors and outdoors, day and night

EMPOWERED TEAMS

Free personnel from repetitive rounds
to focus on assessment and intervention

EARLY RISK IDENTIFICATION

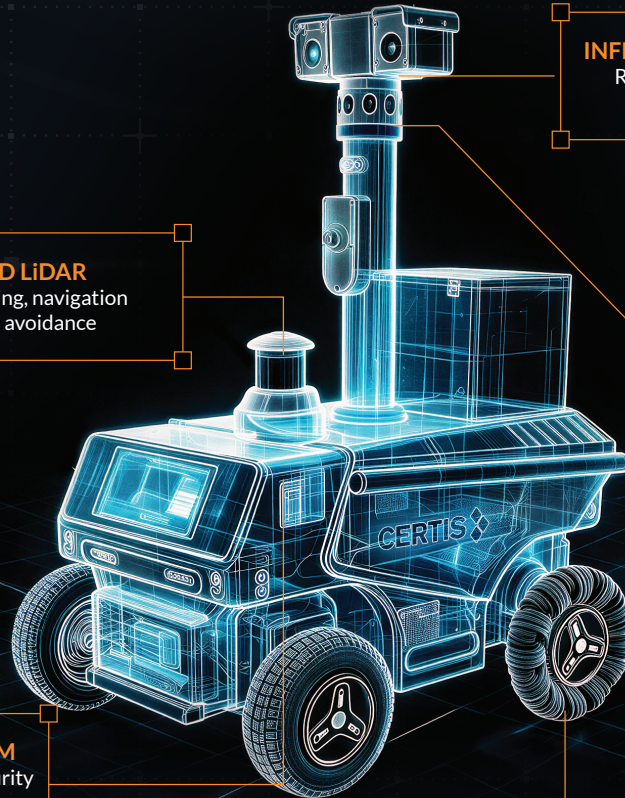

Detect suspicious activity and safety
hazards before they escalate

FASTER, INFORMED RESPONSE

Real-time alerts and live situational data
help teams assess and respond quickly

BUILT FOR REAL-WORLD SECURITY OPERATIONS

INFRARED THERMAL CAMERA

Reliable detection in low-light and night-time conditions

32-LINE 3D LiDAR

Accurate mapping, navigation and obstacle avoidance

360° PANORAMIC VISION

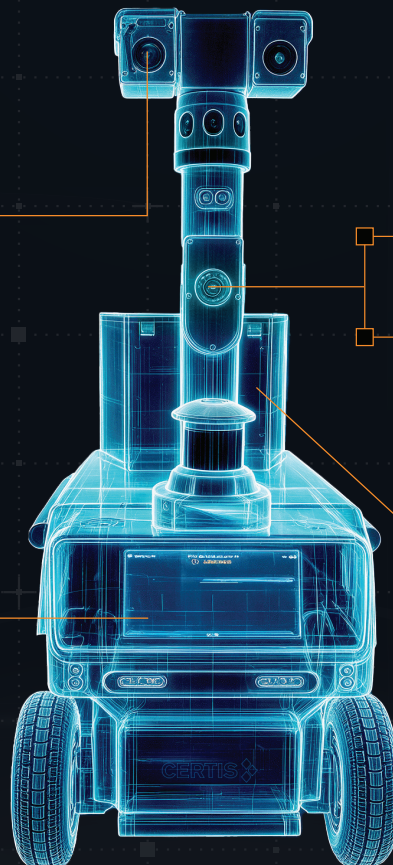

Fewer blind spots and improved situational awareness

SOS & TWO-WAY INTERCOM

Connects people directly with security operators when help is needed

COMPACT & OMNIDIRECTIONAL

Navigates tight routes, shared and crowded spaces with ease

HD VISIBLE-LIGHT CAMERA

Clear live monitoring and high-quality incident evidence

EMERGENCY STOP BUTTON

13.3" ULTRA-HD DISPLAY

Wayfinding information, alerts, instructions and custom content

ON-BOARD STORAGE

Carries emergency supplies, first-aid items or operational equipment

FROM DETECTION TO HUMAN RESPONSE

AI-ENABLED DETECTION

Wallace can identify configured anomalies during patrol, including:

- ✓ Watchlist-based facial matching
- ✓ Unattended-item detection
- ✓ Licence plate recognition

**Optional analytics: illegal parking, smoking, overcrowding, flame and abnormal-heat detection.*

CONNECTED TO 24/7 SECURITY OPERATIONS

Wallace is supported by Certis-trained operators from a 24/7 operations centre for continuous oversight and response.

- ✓ Plan patrols: configure routes and monitor status
- ✓ Review alerts: assess evidence and live context
- ✓ Intervene remotely: dispatch or take control of Wallace when needed
- ✓ Escalate incidents: alert officers with location and evidence for faster response
